## PATENT ELASTIC FIRE & WATER-PROOF CEMENT ROOFING.

Tennesse W. E. CHILDS & CO.'S PATENT ELAS-TIC FIRE AND WATER-PROOF CEMENT ROOFING, and ask the attention of Architects, Builders, Railroad Compinies, and the public to examine its superiority over other ARCHITECTS AND BUILDERS should not fail to examine this Roofing, as it is better and cheaper than any thing in use. The material forms a hard and smooth surface that will resist the action of the atmosphere in every chimate. It is impervious to water, clastic, and flexible. It contracts and expands with the changes of the atmosphere, and will neither evaporate, crack nor rot; and, as to its changlaint. phere, and will neither evaporate, crack nor rot, and, as to its curability, there is no question.

It is practically imperishable, and will perfect fully resist any ordinary external exposure to fire, as is abundantly proved, and we will warrant it witer-proof. We will engage to put our Rooting on over ordinary good heathing, old shingles, tar and gravel, the, since, copper, or iron roofs—it making no difference how steep or flat they may be—for seven dollars per one hundred square fact, it being far the search than any Roof of the old style, and we are sure its constant.

heaper than any Roof of the old style, and we are sure it It will also be found to be the best tring ever invented to cover or mend old leaky tin, tar and gravel roofs, or around chimneys, scattles, dormar windows, and gutters, where the chimners, scattles, dormar windows, and gutters, where the tin is rusted through. This Cement can be put on to last as long as stone, and form a perfect adtesion to any object to which it is applied. Tin Roofs can be painted over (and warranted not to less) at two dilars and fifty cents per handred square feet, which is cheaper and much better than paint. This Roofing will be found to be the best thong for covering large Roofs where they are exposed to fir—such as Steam Mills, Saw Mills, Factories, Railroad Cars Railroad Decks. Cars, Bridges, Depots, Station Houses, Steamboat Decks, and, in fact, every kind of Roof where there is an external exposure from fire. As the Roof is perfect, without a joint in it, it presents no chance for firs to communicate, and any light substance will burn out without igniting. Insurance Offices at Cucinnati, and other places where Childs & Co.'s Cement has been used, insure Build-ings with Boofs covered with this Ucment, at the same rates as for those covered with tron, Copperor Tin

The Cement will be furnished to those at a distance ith directions for using.

Orders sent to the undersigned, through the Postoffice, wit be promptly attended to

To all whom it has concean. This is to certify that have examined specimens and Roufe of W. E. Childs & Co.'s Elestic Fire and Water Proof Coment Roofing," and be lieve it to be minently superior to any other kind of Roof ing in use. I was an eye witness of a severe trial of one of these koofs from a large volume of flame from an associating building, which struck directly upon the roof and cornice for nearly half an hoar. It stood the trial beyond all expectation, and saved the building. T. M. HANKELL,

President Buckeye State Insurance Co. CINCINNATI AGENCY ROYAL INSURANCE COMPANY,

CINCINSAIT, Jan. 7, 1857.

Having made considerable inquiry as to the merits of the 'Patent Elastic Cement Foofing," introduced into this city by thilds & Co., I find it to be highly recommended in this city by many excellent judges; that it is meeting with very ready and general introduction; that its superiority over the tar compension Roofing is skelded and freely admitted. and finally, I expect to adopt it for my next roof, which will be next summer—having intended to use tin, but will try be next summer -- having intended to the system of the 'Patent Elastic Roofing" as a substitute J. PAGE'S PERPETUAL LIME KILN.

THIS KILN will burn four hundred bushels of Lime-Stone (which, if good stone, is equal to one thousand suchcis of slacked lime) in twenty four hours, with four cords of wood, and is perpetual in its operation, the time being drawn once in three to six hours, from the base, and replanished at the top of the cupola. This is but the ordinary every day capacity of the Kiin, as has been abundantly demonstrated by those already in operation. It also makes much better lime than that burned in the or dinary way, all the stone being perfectly burned, Any number of reliable certificates to the capacity of the Kiln, and any other information in reference to it, will be jurnished, on application by letter or otherwise, to the subscriber, who is agent for the sale of rights and putting up Kilus in the State of Tenne McMinnville, Jan. 26, 1557.
